ENVIRONMENTAL POLICY

We are committed to protect the environment where we operate. It is our intention as a responsible corporation to ensure that we operate our business taking consideration environment protection and established requirements. We are committed:

Comply with all relevant environmental rules and regulations, interested parties and company requirements.

Support environment pollution prevention and minimization programs through conservation of natural resources by practicing reducing, reusing and recycling activities

Regularly communicate, participate and consultation with our workers in environment protection.

Continuously improve our environment management system and to review the objectives to enhance performance.

Cooperate and engage with the community, suppliers, customers, contractors, government agencies and other non-governmental organization to protect the environment.

Communicate this policy throughout the organization and make it available to interested parties upon request.

Conduct risk management and mitigate those that have significant environment aspects taking into consideration the internal and external issue and the requirement of interested parties.

Investigate the causes of accidents and incidents and to take immediate preventive action to protect the environment.

Provide employees with facilities, information and training to meet assigned responsibility.

All employees and external parties are required to contribute towards this achievement of this policy.
